EDUCATION

Ahmedabad University

Aug 2024 – May 2028 (Expected)

B.Tech, Computer Science and Engineering | CGPA: 2.9/4.0

Ahmedabad, India

- Secured ACPC Rank 2925 / ~130,000 (top ~2%) in Gujarat state engineering admissions; 94.5 percentile in GUJCET and Class XII boards.
- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Design and Analysis of Algorithms.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL

Frameworks & Libraries: Django, Tailwind CSS, HTML5, CSS3, pandas, NumPy

Databases: MySQL, MongoDB, SQLite

Tools: Git, GitHub, Postman, Vercel

Core CS: Data Structures, Algorithms, Object-Oriented Programming, DBMS, REST APIs

PROJECTS

AU Scheduler | *JavaScript (ES6+), Canvas API, SheetJS, Vercel*

[Live](#) | [GitHub](#)

- Engineered a backtracking-based scheduling engine that enumerates and ranks every clash-free timetable from a student's selected courses, replacing the manual trial-and-error of AU's self-registration.
- Built the app fully client-side and framework-free in vanilla JavaScript with a ~1,900-line controller, using localStorage for persistence and static deployment on Vercel.
- Implemented in-browser AURIS course-data import using SheetJS and a Canvas 2D "save as image" export, keeping all data on-device with no backend.

ScamShield | *Python, Django, SQLite, Tailwind CSS*

[GitHub](#)

- Built a Django cybersecurity platform that screens four input types (URLs, phishing text, QR content, IP indicators) and returns a safe / suspicious / dangerous verdict for each.
- Implemented a heuristic risk-scoring engine combining suspicious-keyword detection, URL-structure analysis, and redirect tracing.
- Added scan history and a configurable password generator backed by SQLite.

SwasthyaSaathi | *Python, AI APIs, Web Technologies*

[GitHub](#)

- Built an AI-assisted healthcare assistant that converts user-reported symptoms into structured guidance: severity level, possible conditions, follow-up questions, precautions, and red-flag warnings.
- Designed the prompt flow and response schema to return consistent, structured medical guidance instead of free-form text.

LEADERSHIP

Competitive Programming Lead

2026 – Present

Programming Club, Ahmedabad University

Ahmedabad, India

- Lead the club's competitive programming wing: organize internal contests and run structured training sessions for members.

ACHIEVEMENTS

- Secured 2nd place out of 8 teams at the IEEE Computer Society Tech Trek, a multi-round team relay event.
- Placed 3rd at the Aetrix Hackathon, PDEU, for building SwasthyaSaathi with a team in 36 hours.
- Finished 2nd at Clash of Code, a coding contest at Ahmedabad University.

CODING PROFILES

Solved **1,000+ problems** across LeetCode, Codeforces, and CodeChef over 339 active days and 65 rated contests.

LeetCode: 470 solved, rating 1653 (top ~18% globally), 100-day streak.

Codeforces: 494 solved (practice and contests); 23 rated contests.

CodeChef: 2★, max rating 1447, 121 solved.
